

Classic Single-Channel Adjustable Micro Pipette

Classic Single-Channel Adjustable Micro Pipette

Model: MSCLBQ211SWISS

Features

- 1. Adjustable Volume Range:** Facilitates liquid handling for a wide array of experimental needs by allowing precise adjustment of aspirated and dispensed liquid volumes.
- 2. High Accuracy and Precision:** Ideal for tasks requiring stringent volume control to

meet experimental requirements.

3. **Digital/Scale Display:** Simplifies volume reading and setting, enhancing operational efficiency.
4. **Versatile Specifications:** Available in various models and ranges to cater to different liquid transfer applications.
5. **Ergonomic Design:** Enhances user comfort and reliability during prolonged use.
6. **Durability:** Resistant to impact, UV exposure, and chemical corrosion, ensuring long-term reliability.

Technical Parameters

- o 10 ~ 100 Micro Liter
- o 20 ~ 200 Micro Liter
- o 100 ~ 1000 Micro Liter
- o 1000 ~ 5000 Micro Liter

The **Classic Single-Channel Adjustable Micro Pipette** offers exceptional reliability and accuracy, making it a trusted choice for laboratories involved in precision liquid handling tasks.
