Overview

Movable dividing boards inside each drawer let staff arrange blocks flexibly, and the label slots are formed by integrated stamping for neat identification. The Tissue Block Storage Cabinet is built from cold-rolled steel sheet with hidden chrome-coated ABS handles and measures 450 × 478 × 1295 mm.

Dry sections before archiving with our Slide Warming Plate, then file the blocks in the Tissue Block Storage Cabinet.

Storing blocks in boxes and shelves causes the issues below. The Tissue Block Storage Cabinet resolves each one.

Key Benefits

High Storage Density
Up to 11,000 blocks in a footprint of 450 × 478 mm.

Flexible Filing
Movable dividers adapt each drawer to different block counts.

Clear Identification
Stamped label slots on every drawer.

Sturdy Build
Cold-rolled steel body and drawers.
