Water Bath, 20L

The product you are describing seems to be a precise constant temperature heating device, suitable for various applications in biology, physics, plants, chemical industry, environmental protection, and more. Below are the detailed specifications and features of the product:

Product Features

- **High Temperature Control Accuracy:** Ensures precise and stable temperature maintenance.
- **Strong Anti-Corrosion:** Made from imported corrosion-resistant plates with advanced manufacturing processes.
- **Energy Saving:** Designed to be energy-efficient with a long service life.

Specifications

- **Model:** MSWBM20SWISS
- **Temperature Range:** Room Temperature (RT) to 100°C
- **Inner Chamber Dimension:** 320 x 320 x 200 mm
- **Shipping Dimension:** [illegible] x 450 x 290 mm

Applications

This device is ideal for precise and constant temperature control for direct or auxiliary heating in:

- **Biology:** Laboratory experiments, incubations, etc.
- **Physics:** Material testing, experiments requiring controlled temperature environments.
- **Plants:** Seed germination, plant growth studies.
- **Chemical Industry:** Reaction control, heating.
- **Environmental Protection:** Sample testing, analysis requiring stable temperatures.
